**SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT**

Mail Stop  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313-1450

Sir:

This statement is filed in the application identified above pursuant to 37 C.F.R. §1.56. No representation is intended that a complete search has been made of the prior art or that no better art references then listed below are available. A copy of the patents listed below is provided for review by the Examiner. Applicant has become aware of these references and is disclosing them in an abundance of caution to ensure full compliance with Applicant's duty of candor and good faith. The filing of this Statement shall not be construed to be an admission that

05/17/2004 DENHNU1 00000032 10049756

01 FC:1806

180.00 DP

the information cited in the Statement is, or is considered to be, material to patentability as defined in §1.56(b).

The Misumi catalogue page 171 shows a stepped ejector sleeve. Catalogue page 172 states that "Stepped Ejector Sleeves are available at 0.4mm thickness." The Misumi catalogue does not disclose a sleeve having (1) a thickness between thirty and forty thousandths of an inch or (2) a sleeve having a thin, metallic lubricious coating.

The Misumi catalogue pages 903-04 disclose positioning screw plugs. A screw plug is shown on page 904 as a "locking plug" to adjust a center pin (also commonly known as a core pin). The screw plug is shown mounted in a stationary press plate of a mold. The mounting plug is not shown mounting an ejector pin or ejector sleeve, nor is it shown mounted in the ejector plate of the mold. Still further, the Misumi catalogue does not show a combination of a screw plug, sleeve and sleeve extension.

The HASCO catalogue shows an extension rod for use with ejector pins and sleeves. The extension rod has a screw on cap for capturing and retaining the pin or sleeve. The Hasco catalogue does not disclose an extension device having a slot structure on one end for receiving an ejector sleeve.

U.S. Patent No. 5,644,833 discloses an ejector coated with a thin, lubricious coating. The '833 patent does not disclose a thin, walled ejector sleeve or coating such a sleeve.

U.S. PgPub 200200118825 discloses coating an ejector with a thin, lubricious coating including compositions including alloys of nickel such as a nickel, phosphorus, polytetrafluorethylene (PTFE) alloy. The '825 PGpub does not disclose a thin wall ejector sleeve or coating such as a sleeve.

The cited references are not believed to disclose or suggest the subject matter recited in the pending claims of the above-identified application. It is therefore believed that the claimed subject matter is patentably distinguishable over these references.

The person making this Statement is the attorney who signs below on the basis of the information in the attorney's file and as provided by Applicant and his representatives.

In accordance with 37 CFR §1.97(b) this Supplemental Information Disclosure Statement is being filed after the mailing of a first Office Action on the merits, therefore the fee of \$180.00 under 37 C.F.R. §§, 1.17(p) and 1.97 is enclosed.

Respectfully submitted,

Law Offices of Mark A. Hamill, P.C.
